1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Brad A. Armstrong on 9/18/01.

The application has been amended as follows:

In claim 31, line 6, --snap- was inserted before "threshold".

2. The following is an examiner's statement of reasons for allowance: The claimed method of employing an analog or variable output sensor with a snap tactile feedback is not disclosed or suggested by the prior art of record. Kambic (IBMTDB) discloses a digital sensor with snap feedback. While digital and analog sensors are disclosed in Mitchell, there is no suggestion to employ such a sensor with a snap type feedback. It is noted that the material 7 of Kambic could arguably be defined having an analog response because it does not have a pure on/off resistance versus pressure curve, no similar type materials do. However, it is employed as an on/off sensor device for digital encoding. For example, see Fig. 7 of Mitchell where the force versus resistance curve 29 is for all practical purposes digital, or on/off in response, and the material represented by curve 29 is not employed in an analog sensor, even though it could be employed in an analog sensor, strictly speaking, since the material does not respond with exact on/off behavior. (The line 29 is virtually vertical but not exactly vertical - see also curve 29). The

claims are interpreted as covering methods that employ variable or analog sensors, as opposed to

on/off or digital sensors.

Any comments considered necessary by applicant must be submitted no later than the

payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for

Allowance."

should be directed to Karl Easthom whose telephone number is (703) 308-3306. The examiner

can normally be reached on M-Th from 6:30AM to 5:00PM.
